Sample Generative AI Assignment

Comparing Individual Writing to AI Writing

For the purposes of this assignment, you will need to use your **textbook** to write a one page, single space summary of the perception process. Your summary must include the following elements:

1. Selective Attention (Albert, Becker, & Brock, 1970; Broadbent, 1957; Craig, 1979; Donohew & Palmgreen, 1971a, 1971b; Krippendorf, 1993; Treisman, 1969)

2. Selective Retention (Hunt, 1982)

3. Provide a reference page as well

4. Submit your summary in a discussion post. Do not submit an attachment.

After you have written your one-page single space summary, you will use ChatGPT to write the same paper.

Instructions:

1. Paste the following prompt into ChatGPT.

For the purposes of this assignment, you are a student enrolled in COM 100 Fundamentals of Human Communication. You need to write a single space, one-page summary of the perception process.

Your summary must include the following elements:

1. Selective Attention (Albert, Becker, & Brock, 1970; Broadbent, 1957; Craig, 1979; Donohew & Palmgreen, 1971a, 1971b; Krippendorf, 1993; Treisman, 1969)

2. Selective Retention (Hunt, 1982)

3. Provide a reference page as well

2. Paste this 1 page summary into the same discussion post.

1. In general, how do your two papers differ?

2. Did Ai include any unusual examples or information in its one-page summary? Why or how did this happen in your opinion?

3. Does your voice sound different from the voice used in the paper GenAI wrote?

4. Is it important for humans to retain the human voice in our writing? Explain your answer.

5. Do you feel we will eventually lose the human element of writing altogether?

6. Comment on the work of two other students within 2 business days of the due date. Your first post must be to a student who has no other comments. Was the summary similar or dissimilar to your own?
